

Meeting Summary from IKECA's Canada Chapter
Held via Conference Call on April 21, 2011

Following an active Chapter meeting prior to IKECA's Annual Conference in Naples, the monthly series of telephone conference calls among those interested in furthering the professional of the Canadian Kitchen Exhaust Cleaning Industry proceeded. While few in number, the output was mighty!

Effort this month focused on editing the draft of the Chapter's first quarterly newsletter, as prepared by Wendi MacCormack. Luc Alarie volunteered to translate the final product into a French version. Future editions will aim to have more pictures than this issue will have.

The internal initiative for this entity is now in making this organization of IKECA appear more like a regional chapter based on geography than a formal structure with a board. Therefore, the policies and procedures section will be removed from the website section for the Canadian Chapter.

Another organization for IKECA to consider as an industry partner and establish some sort of relationship is the Association des Chefs en Securite' d'Incendie du Quebec at www.acsiq.qc.ca.
